

Seclusion Catalogue

2023

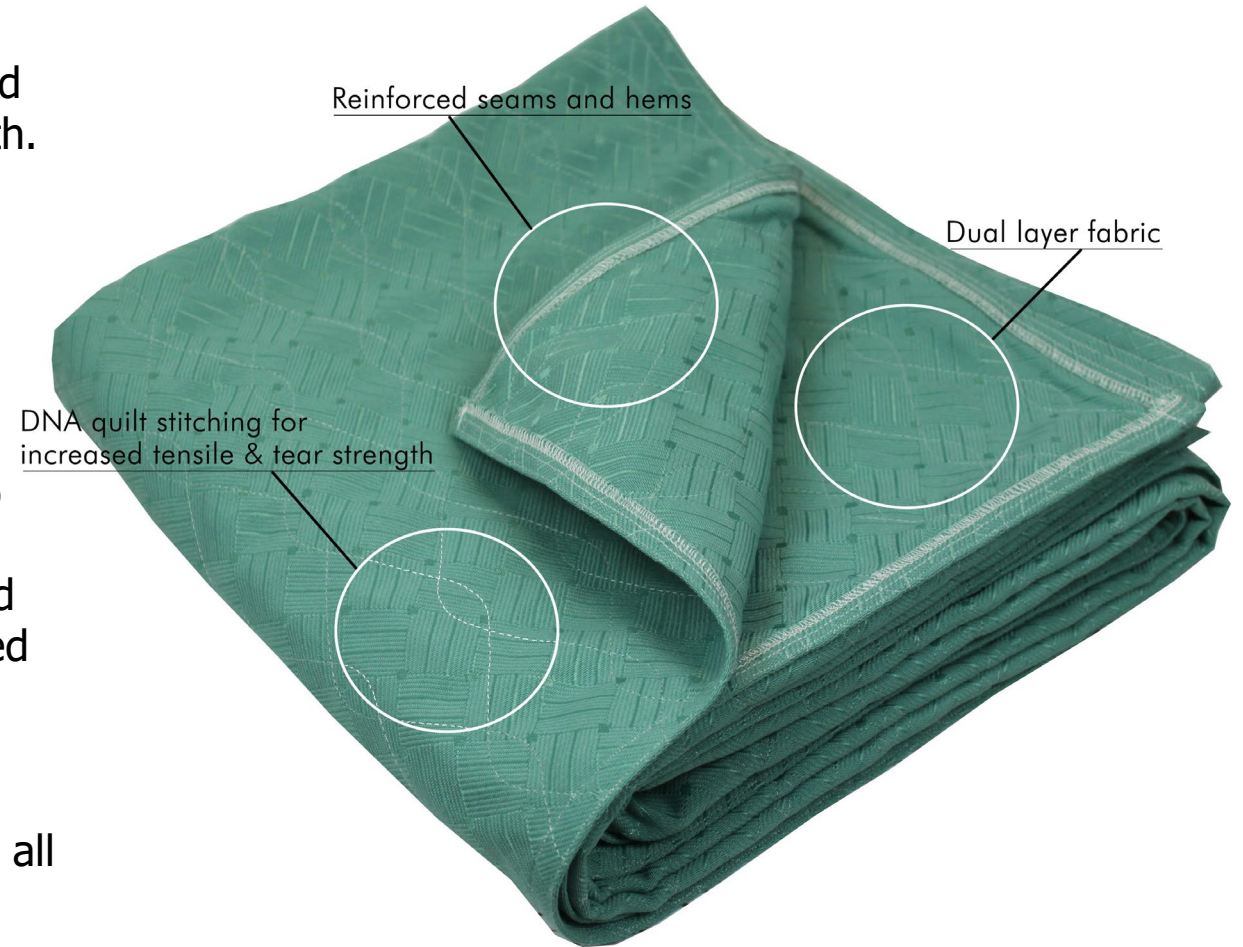

About the Seclusion range

Our Seclusion range uses **Secure-Tex fabric** which features dual-layer durable polyester with reinforced thread & DNA quilt stitching for increased tensile and tear strength.

Designed to assist with **anti-ligature** requirements, the seclusion range provides you with suitable garments and bedding to keep your service users comfortable day and night.

The garments feature highly functional design elements to avoid any opportunities to self-harm. For example, the trousers and shorts feature a 6-piece elasticated waistband which ensure comfort, freedom of movement and increased safety for the user.

Note that the other part of ensuring that service users do not harm themselves is to provide sufficient supervision at all times.
