

## Airpal Air Assisted Transfer Equipment

### Patient specific lateral transfer mattress

**Material:** Advanced fabrics with a coating that can be wiped clean with standard antibacterial cleaner.

**Size:** 198cm long by 86cm wide

**Product code:** AP020-86198

**Washable:** Can be laundered to last throughout a patient's stay in hospital.

**Usage:** The mattress is inflated by the Airpal air supply unit, providing a comfortable lateral transfer for patients with this air assisted lateral patient transfer system. Compatible with XRay and MRI. Snaps are nickel plated brass. Safe working load 1,000kg (or 157 stones).

## Airpal air supply

**Material:** The filter canister is made from non-corrosive stainless steel alloy, and the motor enclosure is high impact moulded plastic. Provided with integrated cable holder and a bed/stretcher hook. Supplied with 180cm long flexible PVC hose. User manual supplied with the air supply.

**Height:** 28cm

**Footprint:** 23cm x 23cm (space taken up by the air supply on the floor)

**Product code:** AP300

**Usage:** The Airpal air supply hose is connected to the mattress, clip it in place with the poppers then switch on the air flow by pressing the large button on the air supply machine.

## Airpal mattress cover (sani-liner)

Material: Advanced fabrics with a coating that allows for laundering.

Size: 198cm long x 86cm wide

Product code: AP100

Usage: The Airpal sani-liner attaches to the mattress with non-ferrous poppers. All materials are MRI-friendly. The sani-liner fully covers the mattress when inflated. The sani-liners provide a quick turn-around between patients, reduced laundry costs and an extended life for the re-usable mattress.
