THE AGILE ™

HYPOTHERMIA EVACUATION BAG

COMES WITH MARCH CHECKLIST ™, PROTECTIVE LINER AND MULTIFUNCTIONAL GEAR BAG

THE AGILE SYSTEM

- Modular system, informed by military operational experience and the reality of casualty care
- Advanced passive warming to aid hypothermia prevention
- Lightweight, robust, compact - pack size matches a medical backpack
- Reusable and easy to clean
- Engineered using reliable, field-proven components from leaders in outdoor and military equipment
- THERMARMOUR® range continuously improving and adapting for military and emergency use
- Manufactured in the UK

Easy handling under pressure in harsh environments (MASCAL)

- Evacuation bag - rolled up, ready for use, compressed with Velcro strap
- Can be shaken out of the gear bag with one hand and is ready for use in seconds
- Large icon at the head end for orientation
- MARCH Checklist™ on the chest area weatherproof, writable, removable for documentation and handover (CRM)
- Gear bag secured against loss with paracord, suitable as a dump pouch / CAS equipment bag

THE EVACUATION BAG

- **Material**: Patented multilaminate **THERMARMOUR® Xtreme** to minimise the effect of hypothermia
- **Colour**: Outside olive-green; inside white, making it easier to detect blood /fluid loss
- **Total size unrolled**: 90 cm x 220 cm **Total size rolled:** 20 cm x 45 cm **Weight**: 2.5 kg
  Suitable for use with Therm-a-Rest™ or rolllmat
- **Water & wind-resistant shell** for effective environmental protection and **wipeable inner surface**
- **Casualty access**: Front can be entirely opened for quick/easy loading/unloading CAS and medical treatment. All around heat and moisture-tight zipper for easy loading and treatment and secure transport of CAS. Features hood with elastic hem to seal tightly around the face
- **Colour coding**: 4 pairs of colour-coded zippers allow treatment openings wherever needed (SEAL / NDC / DRAIN / I.V. /I.O. / ACTIVE WARMING)
- **Patient handling**: 8 carrying handles for safe and efficient evacuation - also suitable for 2 rescuers. Tubular Webbing (25 mm, 20 kN, EN 565) cross hatched across the entire floor area for stabilised transport of the CAS (CQB, handling on Platform CASEVAC MEDEVAC)
- **Compression strap**: Velcro compression strap for ease of packing and transportation
- **Classification**: MDR (EU)2017/745 Medical device class I

THE AGILE

THE AGILE MARCH CHECKLIST ™

- **MARCH FIRST**
- Specifically designed MARCH Checklist™ to ensure structured treatment routine, documentation and transfer: Clear, weatherproof, detachable
- Fixed with velcro at chest height
- Hole rivet for pen attachment

PROTECTIVE LINER

- Replaceable
- Highly absorbent
- Dimensions 70 cm x 100 cm, fitted to base
- Fast to change for the next CAS

MULTIFUNCTIONAL GEAR BAG

- Robust Cordura according to TL: Tactical IR equipment. Water, oil, and dirt repellent
- **Length:** Adaptable 40 - 75 cm **Diameter:** 25 cm
- Volume adjustable: 8 litres (evacuation bag only) or 14 litres (for additional gear)
- Pack size when compressed with evacuation bag, including protective liner 25 cm x 40 cm
- Roll top: waterproof closure, quick opening and closing
- Adjustable, detachable shoulder strap
- Can be attached to the med bag or used as a rapid access trauma pouch

ADDITIONAL EQUIPMENT

Multifunctional Poncho

- Additional THERMARMOUR® hypothermia prevention. Can be used for weather protection, as an isolation pad for treatment on the ground, and as a thermal cover for limbs during medical treatment.

Replacement sets

- MARCH Checklist™, 5 pcs/set
- Protective liner, 5 pcs/set
