Product Overview

The THERMARMOUR X AGILE Carry Bag provides a compact, durable and easily deployable solution for storing and transporting emergency response equipment. It is suitable for emergency response teams and other personnel requiring secure storage and quick access to equipment in demanding environments.

Key Features

The AGILE Carry Bag is designed to:

- Store and protect emergency response equipment.
- Accommodate a range of equipment and supplies.
- Expand to carry larger or bulkier items when required.
- Provide durable, reusable performance.

Care and Safety

Keep dry and store away from direct sunlight or excessive heat until needed. Users are responsible for ensuring the bag is correctly packed, securely fastened and not overloaded.

The THERMARMOUR X AGILE Carry Bag should be inspected before use; damage, significant wear or tearing may reduce its performance. Any bag showing these signs should be removed from circulation and replaced.

Unless clinically soiled, wipe clean with a mild detergent solution and warm water, rinse with clean water and dry thoroughly. Please follow local guidelines to ensure the bag and its packaging are recycled or disposed of safely, as misuse may pose a suffocation risk.

If any damage is identified upon receipt, please contact sales@thermarmour.com before use.
